Mr Leye Ajayi
Consultant Urological Surgeon
The Hospital Of St John & St Elizabeth
60 Grove End Road
St Johns Wood
London
NW8 9NH

Dear Leye,

Re: Mr O Yerbury-Hodgson d.o.b. 05/09/1995
Flat 1a, Burnham Thorpe Court 68-74 Nelson Street London E1 2DY

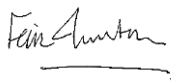

Procedure: Right robotic pyeloplasty

I saw Mr Yerbury Hodgson at The Royal Free Hospital, Lyndhurst Suite. I am pleased to know that following pyeloplasty he is now essentially asymptomatic and can have alcohol and free oral fluids without pain. His follow up Mag3 scan indicates the kidney to be draining satisfactorily, although it is slightly sluggish, but that is to be expected. There is no evidence of any obstruction. The differential function now is 26% on the right, which previously on the DMSA scan was 32. I think this represents a stable situation and therefore I have advised a follow up Mag3 scan in One year.

I will keep you update of his progress.

With best wishes and kind regards

Yours sincerely

Mr Faiz Mumtaz
